WORK EXPERIENCE

Proactive Retention Tool (August 2023 - Present)

CDH Dev
Tools: Pega CDH

Implemented a proactive retention tool for Excellus using Pega Customer Decision Hub (CDH), enabling customer service representatives to deliver personalized Next-Best-Actions across retention and win-back journeys. Leveraged advanced analytics and decision strategies to engage standard-contract and multi-policy members with tailored retention, upsell, and cross-sell offers. This initiative enhanced customer satisfaction, improved retention rates, and strengthened long-term loyalty in a competitive healthcare insurance landscape.

Key Roles and Responsibilities:

- Created Actions and Treatments using 1:1 Operations Manager. Configured decision strategies and suppression rules.
- building real-time decision-management solutions — rules, flows, decision-tables/strategies, engagement policies, Next-Best-Action and campaign modules, SQL Oracle, data flows as per Pega, Integration
- Collaborated with business stakeholders to capture and convert requirements into technical design.
- Configured decision strategies to personalize offers for cross-sell and up-sell initiatives.
- Deployments, defect triage, and production support for CDH features in Excellus.
- Debugged defects using Tracer, log files, and Clipboard for root-cause analysis.

ESHC - Specialty Transformatio-PBM (Nov2022 – July2023)

CDH Dev

Tools: Pega Platform

ESHC – Specialty Transformation PBM application in Pega, supporting the RxP (Prescription Process) team in end-to-end prescription processing and claim initiation with insurance providers. Implemented workflows for first-prescription intake, insurance profile updates, order entry (hold/resume), and rejection adjudication based on clearance or pharmacy rules. Built integrations to trigger external API calls based on publisher and event-type combinations. Supported claim submission flows where insurance companies validate policy, prior authorization, and prescription eligibility. Handled insurance rejections arising from incorrect policy details, unsupported medications, and clearance failures, including scenarios leading to member UnEnrollment.

Key Roles and Responsibilities:

- Worked on Delegations, Data Transforms, Declare Pages and Data pages. section, validation, Report Definition, activity, Work Baskets, Routing and UI control
- Defined SLAs at assignment and case levels to ensure timely task completion and configured escalation actions via email for overdue cases.
- Developed Report Definitions and summary reports for Business insights
