WORK EXPERIENCE

Vodafone – Senior Pega Marketing Consultant

August 2025 – Present | UK Telecom Domain

- Providing L2 Production Support for Pega CDH AOM application supporting UK Telecom campaigns.
- Monitoring and supporting NBA decisioning framework across real-time and outbound channels.
- Handling P1/P2 incidents, service requests, and defect resolution within defined SLAs.

- Performing Root Cause Analysis (RCA) for strategy failures, data flow issues, and campaign defects.
- Monitoring system performance using AppDynamics and Dynatrace dashboards.
- Managing incidents, problems, and changes via BMC Remedy aligned with ITIL standards.
- Supporting CI/CD production deployments and conducting post-release validations.
- Collaborating with UK business stakeholders, DevOps, and development teams for seamless service delivery.

Infosys – Senior System Engineer

February 2022 – March 2025

PROJECT EXPERIENCE

Project: NBA (Next Best Action) – Verizon (US Telecom)

Role: Decisioning Developer | Environment: Pega 8.7

- Designed and configured NBA strategies and decision rules.
- Worked on Decision Data, Engagement Policies, and Action configurations.
- Developed REST services returning JSON responses for real-time integrations.
- Configured campaigns and real-time events for personalised customer engagement.
- Generated RAP deployment packages and supported SIT testing.
- Resolved production defects and performed debugging using Clipboard, Tracer, and Live UI.

Project: NBO (Next Best Offer) – Verizon (US Telecom)

Role: CDH Developer | Environment: Pega 8.7

- Implemented decision logic using strategies and ADM models.
- Integrated REST APIs for real-time offer retrieval.
- Worked on Interaction History configuration and adaptive model usage.
- Resolved production defects and supported SIT validation cycles.
- Performed UI and backend debugging using Pega diagnostic tools.
