

**Sairam Yalla**

Hyderabad, India

Email: yallasairam1@gmail.com · Phone: +91-7095543549

**Objective**

Logical and organized individual with a strong foundation in software engineering and decisioning solutions. Proficient in Pega CDH concepts with the ability to provide error-free configurations and translate complex business requirements into innovative, customer-centric solutions. Known for excellent teamwork, ownership, and communication skills. I'm immediately available and open to opportunities as a Pega Decisioning Consultant and PEGA CDH, with flexibility to work onsite, hybrid, or remote across global locations.

**Professional Summary**

Pega CPDC 24.2 Certified Pega CDH / NBA Decisioning Consultant with 4.2 years of focused experience at TCS & Instellars, Worked on Vodafone Netherlands (Ziggo), Vodafone Hungary and National Australia Bank (NAB) projects. Expertise in Next-Best-Action (NBA) Design, multi-channel campaigns, real-time containers, actions & treatments, suppression and volume constraints, strategy design, data flows, data sets, and engagement policies. Strong experience in data flow and data set optimization, performance tuning, alert reduction, AWS → On-Prem migration, Pega upgrade retrofit (8.8.3 → 24.1), and UI-level enhancements. Skilled in AWS Cloud, Pega PDC, Log Viewer, and database collaboration for end-to-end campaign optimization and stability improvement.

**Core Skills**

- Pega CDH / Decisioning: NBA Designer, Multi-Channel Campaigns, Real-time Events & Containers, Suppression Policies, Constraints, Segments, Arbitration, Expression Builder, Engagement Policies, Actions & Treatments
- Performance Optimization: Data Flow & Data Set Optimization, Alert Reduction, PDC Monitoring, Log Analysis, RCA, Queue Processor & DB Timeout Analysis
- Data & DB Management: Property Creation, Class & Table Mappings, Decision Tables, Data Transforms, Data Cleanup, DB Index Optimization, Collaboration with DB Teams
- Campaign Execution: Campaign Creation, Volume & Suppression Constraints, Segment Design, Campaign Optimization & Validation
- Migration & Upgrade: AWS → On-Prem Migration, Pega Upgrade Retrofitting (8.8.3 → 24.1), Post-Upgrade Validation & RCA

- AWS Cloud: CloudWatch (Monitoring & Alerts), S3 (Data Storage & Retrieval), IAM (Roles & Permissions Management)
- Automation & Reporting: Report Definitions (Tabular & Graphical), Scheduled Automated Reporting, Business Monitoring
- Tech: SQL, Linux (Basics), AWS Fundamentals
- Testing: Unit Testing, Test Data Creation, Functional Validation, UI-level Validation (e.g., Radio Button → Dropdown changes)

## **Professional Experience**

Tata Consultancy Services (TCS)

Pega CDH Decisioning Consultant | Feb 2022 – Mar 2023

### **Project 1: Vodafone Ziggo (Netherlands)**

Feb 2022 – Mar 2023 | Role: Pega CDH Developer

- Developed Next-Best-Action (NBA) strategies to deliver personalized customer offers across multiple channels.
- Configured Actions, Treatments, Suppression Policies, Constraints, and Volume Constraints for precise targeting.
- Designed and executed Multi-Channel Campaigns ensuring orchestration across Email, SMS, and Push channels.
- Worked on Real-Time Containers (RTCs) for dynamic action delivery across digital touchpoints.
- Built, validated, and optimized Data Flows and Data Sets for efficient processing, reduced runtime, and enhanced stability.
- Utilized NBA Designer to align business objectives with customer engagement strategies.
- Collaborated with business stakeholders to fine-tune engagement policies and campaign eligibility logic.

### **Project 2: Vodafone Hungary**

Mar 2023 – Jan 2026 | Role: Pega CDH Developer

- Implemented multiple requirements including logic changes, creation of new classes, and class-table mappings.

- Designed Decision Tables, Strategies, Data Flows, and Data Sets, enhancing business agility and response times.
- Led initiatives for Alerts Reduction, collaborating with DB teams to tune queries and purge historical data, improving application performance.
- Actively involved in AWS → On-Prem Migration, ensuring seamless transition of configurations, data, and integrations.
- Played a key role in Pega Upgrade (8.8.3 → 24.1) — performing rule retrofitting, validations, and impact analysis post-upgrade.
- Contributed to UI-level enhancements in CDH, modifying configuration screens and components based on client requirements.
- Coordinated with PDC and Log Viewer for root cause analysis of performance bottlenecks.
- Suggested and implemented DB optimizations to reduce execution delays and improve campaign runtime.
- Built automated reporting frameworks for business monitoring and audit compliance.

### **Project 3: National Australia Bank (NAB)**

**Jan 2026 – Present | Role: Pega CDH Developer**

Client: National Australia Bank (NAB)

- Worked on data ingestion backup solution to handle failures during daily data refresh, significantly reducing data outage impact and ensuring high availability of decisioning data.
- Implemented request and response mapping enhancements for new business requirements, ensuring accurate data flow between external systems and Pega CDH.
- Designed and modified data flows to support new offer onboarding and optimize processing logic.
- Created new attributes in the integration layer as part of new offer requirements and ensured proper data propagation across the system.
- Integrated APIs to ingest data into Cassandra tables, enabling downstream usage in decisioning strategies.
- Utilized newly created attributes in NBA actions and eligibility criteria to deliver personalized offers based on business conditions.

### **Education**

Bachelor of Technology (B.Tech) — Graduated Aug 2021 | CGPA: 8.1

**Certifications**

Pega CPDC (Customer Decisioning Consultant) — Version 24.2
