

YASHOVARDHAN MAKKALA

Pega Senior System Architect And Decisioning Consultant

📞 9948853669 @ yashovardhan.makkala@randstaddigital.com 🔗 <https://www.linkedin.com/in/makkala-yashovardhan>

SUMMARY

- Strategic and results-oriented **Pega Senior Decisioning Consultant** with **3.7 years of experience** in **designing, implementing, and optimizing Pega Customer Decision Hub (CDH) applications**. Expertise in **Next Best Action (NBA) strategies, adaptive models, real-time decisions, and multichannel engagement** to enhance customer experiences and drive business outcomes.
- Proficient in analyzing business requirements and translating them into **NBA Designer engagement policies and strategies**. Skilled in configuring **arbitration, taxonomy, engagement policies, and extension strategies** to meet business needs. Responsible for building and unit testing the **end-to-end decisioning strategy framework**, and related components such as **actions, business rules, treatments, segments, and contact policies**.
- Experienced in managing **Pega 8.x to 24.x upgrades**, installing hotfixes, resolving migration challenges, and improving system scalability. Adept at **integrating CS applications with CDH** for outbound call interactions and executing **simulations** to evaluate decisioning strategies.
- Configured and optimized **Adaptive Models** by adding **predictors** to refine customer interactions. Troubleshoot **segments, engagement policies, agent issues, dataflow, and deployment errors** to ensure system stability. Restructured the **Context Dictionary** to enable **multilevel decisioning**.
- Strong ability to **collaborate with stakeholders, mentor teams**, and align **business objectives** with **technical solutions**. Skilled in **performance optimization of data flows** and debugging **decisioning artifacts** to ensure seamless execution.
- Hands-on experience in setting up CDH using the setup wizard, building data models, and ingesting customer data. Participated in the full project lifecycle, including requirements gathering, design, development, testing, deployment, and maintenance.

EXPERIENCE

05/2025 - Present

Location

Pega CDH Developer

Randstad Digital

- Implemented **FIFO (First-In-First-Out) logic** for outbound communications to ensure fair offer prioritization and improved customer experience.
- Designed and executed end-to-end decisioning automation testing by creating comprehensive test suites, test cases, and decision strategies to ensure accuracy and reliability.
- Actively participated in post-upgrade activities from Pega **8.3 to 24.2**, including validation and stabilization of decisioning artifacts.
- Enhanced Interaction History** reports by adding additional attributes to support advanced reporting.
- Developed custom functions and Java steps within decisioning and rule logic to meet complex business requirements and drive desired business outcomes.

10/2023 - 04/2025

Hyderabad

Pega Engineer III

Enigma Metaverse

- Developed and deployed a comprehensive **CDH application**, overseeing design, data flows, and context dictionary configuration.
- Developed actions and designed offer flows, incorporating treatments and modifying the associated HTML code for enhanced functionality.
- Implemented **Real-Time Decisioning** in Pega Customer Decision Hub to address cart abandonment for an insurance company, designing personalized payment reminder strategies across multiple channels, resulting in a significant increase in policy conversions by targeting customers who added products to their cart but did not complete payment.
- Implemented **Next Best Action** through various outbound and inbound channels, including **Email, SMS, and Web**, to enhance customer engagement and decision-making.
- Executed **multichannel campaigns** and configured **event-driven campaigns** to enhance customer experiences.
- Imported and updated **volatile and non-volatile** customer and product data using **batch** and **real-time data flows**.
- Acted as the **primary point of contact** for all Customer Decision Hub development activities, ensuring client requirements were met and addressing concerns.
- Involved in **Pega 8.8.3 to 24.1 upgrade**, resolving migration issues, updating NBA Designer, and ensuring smooth post-upgrade activities.
- Configured and optimized **Adaptive Models** to enhance decisioning and personalization by adding **predictors** to improve the accuracy and customization of decisioning outcomes.
- Executed and analyzed **simulations** to evaluate decisioning strategies and improve business outcomes.
- Troubleshooted **segment issues, engagement policies, and dataflow errors** to enhance system stability.
- Restructured the Context Dictionary to support **multilevel decisioning**, enhancing decision strategies, and implemented a behavioral data component to improve Next-Best-Action recommendations.
- Configured Pega decisioning rules, strategies, engagement policies, constraints, and channel settings to enhance customer interactions and modified extension strategies to meet business needs.
- Integrated **CS applications with CDH** to facilitate **payment reminders via outbound calls**, leveraging the **handoff shape** in action offer flows.
- Conducted design and code reviews, performed testing to ensure decisioning solutions met business requirements while being scalable and maintainable, led training sessions for team members, and **mentored** them to enhance their technical skills.
- Optimized dataflow performance** by implementing partition keys and indexing to improve processing speed.

EXPERIENCE

11/2022 - 09/2023

Hyderabad

Pega Engineer II

Enigma Metaverse

- Having knowledge in **Customer Service and Sales Service frameworks**.
- Created and configured **Connect REST** and **Service REST** integrations to enable seamless communication between systems.
- Implemented dynamic data mapping in customer offers by structuring Page List data using Section and Table layouts, integrating them into HTML to overcome **Rich Text Editor limitations** and ensure accurate, personalized content.
- Experienced in **troubleshooting agents**, and effectively resolving agent issues to ensure smooth operations.
- Monitored and troubleshot batch campaigns to ensure successful execution and performance.
- Configured email listeners to track bounced emails, improving email campaign effectiveness.
- Implemented **job schedulers and queue processors** to automate and optimize background processing tasks.
- Configured **file and email listeners** for real-time data processing and notifications.
- **Captured API payloads** for Connect API calls to ensure accurate data exchange between systems.
- Sound skills on PRPC debugging tools such as Tracer and Clipboard.
- Developed **activities** and **data transforms** to meet business requirements, while designing user interfaces, sections, and local flow actions to enhance user experience.
- Customized the Rich Text Editor by adding additional Poppins fonts to enhance UI consistency and user experience.

08/2022 - 10/2022

Bangalore

Associate Software Engineer

Ionidea

- Trained in Pega, Java, Web Technologies and SQL.

EDUCATION

08/2018 - 06/2022

Bangalore

B. Tech: Electronic And Communication Engineering

Presidency University - Bangalore

KEY ACHIEVEMENTS

Data Management Efficiency

Successfully saved 1 million records in the database using a File Listener, significantly improving data management efficiency.

Performance Optimization

Improved loading time for local actions by optimizing checks for lock instances, enhancing routing efficiency.

Real-Time Decisioning Implementation

Successfully implemented real-time decisioning strategies utilizing Real-Time Events, enabling immediate and personalized customer interactions that enhanced user experience and drove engagement.

System Reliability

Enhanced the connect REST rule in pega to enable the capture of multiple cookies, improving flexibility and functionality beyond the standard single cookie option.

Improved Customer Engagement

Executed multiple successful multichannel campaigns, resulting in a significant increase in customer response rates and overall campaign effectiveness.

SKILLS

Pega	CDH	HTML	CSS	Java	SQL	Troubleshooting and Debugging	Performance Optimization
Integration	Real-Time Decisioning	Data Modeling and Data Management	Case Management	Deployment			
User Experience	Application Development	Campaign Management	Next Best Action				

CERTIFICATION

Certified System Architect

Certified Senior System Architect

Certified Pega Decisioning Consultant
