Experience Summary

- Pega Developer with 4.2 years of experience in designing and implementing end-to-end case lifecycle and flows and implementing real-time Next-Best-Action (NBA) strategies for customer engagement and personalization.
- Strong expertise in Decision Strategies, NBA Designer, Engagement Policies (Eligibility, Applicability, Suitability), and Prediction Studio with hands-on experience in Adaptive Models and Real-Time Decisioning. Skilled in Customer Profile Designer, Segmentation, Audience Creation, and multi-channel decisioning across Web, Mobile, Email, and SMS.
- Proficient in Pega PRPC including Data Pages, Data Transforms, Activities, Case Flows, Decision Rules, and Declarative Rules, along with experience in REST API integrations. Experienced in Interaction History, debugging tools (Clipboard, Tracer, Live UI), and Agile/Scrum delivery across Telecom, Banking, and Healthcare domains.

Skills

- Technical Skills: Pega PRPC, CDH, Decision Strategies, REST APIs, SQL
- CDH Skills: NBA Designer, Engagement Policies, Prediction Studio, Real-Time Decisioning
- Tools: JIRA, Agile/Scrum
- Domain: Telecom, Banking, Healthcare

Project Profile

Pega CDH Developer | Accenture, Pune, India

Duration: Dec 2021 – Present

1. Telecom Customer Engagement (CDH – Next-Best-Action)

Client: TPG Telecom

Project Description:

Implemented Pega CDH to deliver real-time Next-Best-Action (NBA) strategies across SMS, Email, Mobile App, and Call Center for personalized customer engagement.

Roles and Responsibilities:

- Designed Next-Best-Action (NBA) strategies using Engagement Policies, improving personalized offer targeting and customer engagement.
- Configured Actions and Treatments across multi-channel platforms (Web, Mobile, Email, SMS), increasing campaign reach and consistency.
- Developed Adaptive Models in Prediction Studio, enhancing decision accuracy and data-driven personalization.
- Implemented Real-Time Containers for offer delivery, improving customer interaction and click-through rates.

- Integrated external systems via REST APIs, enabling seamless real-time data exchange and reducing response latency.

2. **Banking Cross-Sell & Retention System**

Domain: Retail Banking

Project Description:

Developed a CDH-based decisioning system for cross-sell, upsell, and retention using real-time customer insights.

Roles and Responsibilities:

- Designed NBA strategies for cross-sell and retention, increasing customer engagement and revenue opportunities.
- Implemented Always-On Decisioning, enabling real-time personalized offers across digital and assisted channels.
- Built customer segmentation using Decision Strategies, improving targeting accuracy and campaign effectiveness.
- Monitored and optimized campaign performance using insights from decisioning outcomes.

3. **B2C Case Management System (Pega PRPC)**

Client: Etisalat

Project Description:

Developed a Pega PRPC Case Management system for B2C service requests, improving efficiency and resolution time.

Roles and Responsibilities:

- Designed and implemented end-to-end case lifecycle and flows, improving process efficiency and resolution time.
- Configured assignment routing (Worklist, Workbasket, Skill-based) and SLA rules, enhancing workload distribution and ensuring timely case resolution.
- Developed UI components (Sections, Harness, Flow Actions) and implemented business rules using Data Pages and Data Transforms, improving usability and data processing efficiency.
- Integrated external systems using REST APIs and created reports, ensuring seamless data exchange and performance tracking.
- Performed debugging using Clipboard and Tracer, improving application stability and reducing defects.

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering
Sagar Institute of Research and Technology, Bhopal, India

Certifications

- Pega Certified System Architect (CSA) – [Pegasystems Inc.](#)
- Pega Certified Senior System Architect (CSSA) – [Pegasystems Inc.](#)
- Pega Certified Decisioning Consultant (PCDC)
