OBJECTIVE

Pega CDH Decisioning Consultant with 4+ years of experience in designing and delivering Next-Best-Action (NBA) solutions using Pega Customer Decision Hub (CDH) Framework. Certified in CSA, CSSA, and CDH with strong expertise in NBA Designer, Adaptive Decision Manager (ADM), real-time decisioning, and customer engagement strategies. Experienced in building scalable, data-driven decisioning frameworks, implementing 1:1 customer engagement, and integrating real-time and batch channels to drive measurable business outcomes.

TECHNICAL SKILLS

Pega CDH & Decisioning: Actions & Treatments, Engagement Policies, Contact Policies, Decision Strategies, Proposition Filters, Adaptive Decision Manager (ADM), Predictive Models, Interaction History (IH), Real-Time Containers, Event Strategies.

Data & Decisioning Frameworks: Data Flows, Data Jobs, Data Sets, Decision Tables, Decision Trees, Scorecards, Decision Data, Data Pages,

Integration & Channels: REST / SOAP Services, Connect-REST, Service-REST.

Security & Performance: ABAC, RBAC, Access Groups, Performance Tuning, Debugging (Tracer, Clipboard, Live UI)

Programming & DB: SQL, Python, Java, XML, React, AWS

EXPERIENCE

PROJECT -1: Allied Solutions | Virtusa Consulting Services

Role: Engineer

- Implemented Next-Best-Action (NBA) solutions using NBA Designer, including Actions, Treatments, Engagement Policies, and Contact Policies.
- Built and optimized decision strategies leveraging Proposition Filters, When rules, and multi-level decisioning frameworks.
- Configured Adaptive Decision Manager (ADM) models to enable real-time personalization and improve customer engagement outcomes.
- Developed real-time and batch decisioning pipelines using Data Flows and Data Jobs.
- Configured Real-Time Containers and Event Strategies for inbound channel interactions.
- Implemented Interaction History (IH) and IH Summary for tracking and optimizing customer engagement.
- Built Decision Tables, Scorecards, Data Transforms, and Data Pages to support decisioning logic.

- Configured Activities and integrations (REST services) for external system communication.

PROJECT 2: UNUM The Group | Virtusa Consulting Services

Role: Associate Engineer

Worked as a Pega Developer in the Insurance domain

- Worked on Technical Implementation of business requirements through user stories.
- Worked Extensively on several rules such as Data Transforms, Report Definitions, Decision Tables, Flow Actions, Sections, Data Pages and validations.
- Resolved bugs across the dev and UAT environments using PRPC debugging tools: tracer, Clipboard, Live UI.
- Configured Activities to update sales records and opportunities based on incoming data from external systems
- Refactored the code to improve performance of the application
- Configured Service Level Agreements (SLAs) to enforce goal and deadline compliance, automatically notify assignees of pending tasks, and route assignments to appropriate Work Queues upon escalation.
- Delivered accurate and scalable reporting solutions using Report Definitions.
- Utilized Product Rules for manual deployment across development, Testing and staging.

CERTIFICATIONS

- Pega Certified System Architect 8.7-NOV 2022
- Pega Certified Senior System Architect 8.8 - AUG 2023
- Pega Certified Decisioning Consultant 8.8 - NOV 2023

EDUCATION

Bachelor of Technology | Kakatiya University

DATES FROM: 2018 – 2022

PERCENTAGE: 88%

ACTIVITIES

- Participated in Virtusa Global Pega Hackathon
- Participated in Constellation Training at Pega Systems
