Professional Summary

Pega Developer with 4 years of experience designing and implementing BPM solutions using Pega PRPC (8.x). Skilled in case management, REST/SOAP integrations, UI customization, and a wide range of rule types including decision rules, declaratives, data transforms, activities, and flows. Strong grasp of Agile methodologies and proven ability to deliver secure, scalable applications aligned with business goals.

Work History

Tata Consultancy Services (TCS)	11/2021 – Present
Pega Developer – CLM / KYC Framework - Automated end-to-end client onboarding and compliance processes by designing and configuring Pega case types, flows, activities, data pages, decision rules, and UI sections. - Implemented business logic for KYC verification, document management, and customer risk assessment workflows in alignment with regulatory and compliance standards. - Integrated Pega applications with external systems using SOAP and REST APIs to enable secure, real-time data exchange and validation. - Collaborated closely with business analysts and solution architects to analyze requirements and translate them into scalable Pega rules and workflows. - Managed rule versioning, performed debugging, and supported application deployments across development, QA, and production environments. - Actively participated in Agile ceremonies, including sprint planning, daily stand-ups, reviews, and retrospectives, ensuring timely delivery of features.	05/2024 – Present
Pega Developer – Smart Dispute Framework - Designed, developed, and enhanced the Smart Dispute application for financial dispute and chargeback management. - Customized case types, flows, activities, data pages, and decision rules to align with business requirements. - Implemented integration services (REST/SOAP) to seamlessly connect external systems with Pega applications. - Optimized declarative rules, when conditions, and data transforms to streamline and improve business processes. - Utilized Tracer for debugging and analyzing rule execution to identify and resolve issues effectively. - Leveraged Clipboard and Live UI tools to inspect data, monitor application behavior, and validate user interface configurations. - Handled deployments to higher environments including QA, SE, and UAT, ensuring smooth transition and stability across releases.	01/2022 – 04/2024

Education

Bachelor of Technology (B.Tech) in Mechanical Engineering From RVR & JC Engineering College. 07/2017 – 09/2021

Certifications

Pega Certified System Architect (CSA)
Pega Certified Senior System Architect (CSSA)

Technical Skills & Tools

Pega & Automation: Pega PRPC, Selenium, Cucumber, NightWatch
Programming & IDEs: Core Java, Eclipse IDE
Databases: PostgreSQL, AQT
API Testing: Postman, Bruno

Awards

Best Team Award for the cleanest release
On The Spot Award for dedication and commitment towards organization
