PROFESSIONAL SUMMARY

Detail-oriented Computer Science Engineer with a strong foundation in **Data Structures, Algorithms, and System Design**. Proven track record in developing IoT-based solutions and scalable backend systems. Skilled in Python and SQL, with a passion for building efficient, user-centric applications and mentoring junior developers in technical architecture.

EDUCATION

Kalasalingam University

Expected May 2025

Bachelor of Engineering in Computer Science (GPA: 8.6/10.0)

Tamil Nadu, India

- **Relevant Coursework:** Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

TECHNICAL SKILLS

Languages: Python (Proficient), SQL (Advanced), C++, HTML/CSS

Frameworks & Databases: MySQL, PostgreSQL, Redis, RESTful APIs, Microservices Architecture

Tools & Platforms: Git/GitHub, Docker, VS Code, Postman

Core Concepts: System Design, Database Normalization (1NF/2NF/3NF), OOPs, Machine Learning

EXPERIENCE & LEADERSHIP

Technical Mentor & Instructor

June 2024 – Present

Freelance / Community Education

Remote

- Orchestrated a comprehensive **DSA & Python bootcamp for 50+ students**, leading to a 30% improvement in peer-reviewed mock interview scores.
- Guided junior developers in architecting **IoT projects**, focusing on clean code practices and optimized sensor data processing.

PROJECTS

Smart Home Door Unlock System

IoT, Machine Learning, Python

- Engineered an automated access control system using **Scikit-Learn** to verify identity via real-time facial recognition.
- Achieved **95% authentication accuracy** and decreased manual entry latency by **40%** through optimized data transmission.

Smart Water Bottle (Medical Reminder)

IoT, ESP32, Cloud Integration

- Developed an IoT-enabled hydration tracker with medical alerts, improving medication adherence by **60%**.
- Maintained **98% data consistency** between the hardware device and cloud-based health dashboards.

Spacecraft Navigation Game

Python, Pygame, OOP

- Designed an interactive 2D simulator managing complex collision detection and sprite animations at **60 FPS**.
- Utilized spatial partitioning to increase obstacle handling capacity by **25%** without decreasing performance.

CERTIFICATIONS

- Data Structures and Algorithms Specialization (Coursera/University) | May 2024
- Cloud Technologies & Infrastructure Certification | Aug 2023
